### AUTOMATIC FACE RECOGNITION AND ATTENDANCE

Face recognition is one of the mostly used biometrics. It can used For security,authentication,identification and has got many more advantage. Despite of having low accuracy when compared to face recognition it is being widely used due to its contactless and non invasive process. Face recognition system can used for attendance making in schools,colleges,offices etc.

### AVOIDING PHISHING ATTACK ON ONLINE VOTING SYSTEM USING VISUAL CRYPTOGRAPHY

Voting system Using Visual Cryptography (VC) aims at providing a facility to cast vote for critical and confidential internal corporate decisions. The election is held in full confidentiality by applying appropriate security measures to allow the voter to vote for any participating candidate only if he logs into the system by entering the correct password which is generated by merging the two shares using VC scheme. Administrator sends share 1 to voter e-mail id before election and share 2 will be available in the voting system for his login during election.
